Business Operations

### WORK EXPERIENCE

#### UseLess

March 2026 - June 2026

Freelance Product Designer

Redesigned a mobile app from the ground up, including a new visual identity, information architecture, navigation system, and overall user experience. Delivered a complete design concept currently being implemented.

#### Bosch Digital

Product Designer (Internship & Part Time)

March 2024 - August 2025

As part of an internal design agency serving software projects across the company, I co-designed an AI application from the ground up with one other designer, leading the design language and system and driving user research and usability testing. We validated the concept through an MVP, securing internal investment to build a first full version.

#### Volkswagen Group

October 2023 - December 2023

UI/UX Designer (Part Time)

Contributed to the development of a cross-company, agile software project in a production environment.

#### Audi Interaction GmbH

October 2022 - October 2023

UX Researcher (Part Time)

Conducted customer research on Audi's social media channels and mapped a user journey concept exploring how social interactions could translate into online sales opportunities.

#### Audi Interaction GmbH

December 2021 - October 2022

Social Media Agent (Part Time)

Supported Audi customers through social media channels, analyzing user feedback and interactions to better understand customer needs and expectations.

#### Volkswagen AG

September 2018 - July 2021

Apprenticeship In Industrial Business Management

Acquired broad business management experience across seven departments, ranging from facilitating workshops to independently managing projects
